

Commissioner Echols' Motion

- I move that we:
 1. Adopt the Customer Stipulation entered into between the Georgia Power Company and its ratepayers
 2. Set the Company's Capital Structure as filed
 3. Set the ROE at 10.5%
 4. Modify the Customer Settlement Agreement to read: The "Behind the Meter" netting period length shall be changed from instant to monthly for the first 5000 rooftop solar ratepayers or until the installed capacity reaches 32 Mw – whichever comes first. This will be re-evaluated in the next rate case.
 5. Additionally, the fee for Analog Meter Ratepayers shall be dropped by \$1.00 per month. This will be re-evaluated in the next rate case.
